

## Shrubs

Fault	Industry Cull Rating
Excessive chlorosis, pests or disease evidence, or mechanical injury	Major Fault
Lack of symmetry, branches poorly distributed forming an undesirable plant.	Major Fault
Branches weak or poorly formed	Major Fault
Leaves of improper shape, size, texture and color, except for new spring growth	Major Fault
Severe creasing, cracks, cambium peeling, cavities, holes or dead wood.	Intermediate Fault
Cold/freeze damage.	Intermediate Fault
Excessively rootbound.	Intermediate Fault
Large roots growing out of container.	Intermediate Fault
Plant not established in container.	Intermediate Fault
Excessive scarring, scars not healing properly	Intermediate Fault
Poor pruning cuts showing excessive protrusion.	Minor Fault
Poor graft unions not healing properly or rough cut.	Minor Fault
Noxious weeds in container	Minor Fault

## Vines/Groundcovers

Fault	Industry Cull Rating
Excessive chlorosis, pests or disease evidence, or mechanical injury	Major Fault
Lack of symmetry, runners/branches poorly distributed forming an undesirable plant.	Major Fault
Runners/branches weak or poorly formed	Major Fault
Plant not established in container.	Intermediate Fault
Excessively rootbound.	Intermediate Fault
Large roots growing out of container.	Intermediate Fault
Cold/freeze damage.	Intermediate Fault
Excessive scarring, scars not healing properly	Intermediate Fault
Leaves of improper shape, size, texture and color, except for new spring growth	Intermediate Fault
Low number of runners/branches, runners/branches uniform in length	Minor Fault
Poor pruning cuts showing excessive protrusion.	Minor Fault
Noxious weeds in container	Minor Fault

## Flowers

Fault	Industry Cull Rating
Pests or disease evidence	Major Fault
Lack of symmetry, branches poorly distributed forming an undesirable plant.	Major Fault
Branches weak or poorly formed	Major Fault
Large roots growing out of container.	Major Fault
Plants out of proportion to container size	Intermediate Fault
Plant not established in container.	Intermediate Fault
Excessively rootbound.	Intermediate Fault
Leaves of improper shape, size, texture and color, except for new spring growth	Intermediate Fault
Excessive chlorosis or nutrient deficiencies	Intermediate Fault
Weeds in container	Minor Fault
Damage from shipping/mechanical damage	Minor Fault
